

PRODUCT RECOMMENDATIONS AT THE END OF LIFE

After the end of useful life of the product manufactured by RADIADORES ORDOÑEZ, S.A., it will be necessary to take the product to an authorized waste management company where the different materials will be separated and can be recycled independently.

The most common materials will be aluminum and plastic (water radiator tanks), and there may be small metal or plastic accessories, which will also have to be managed properly.

In any case, the product shall not be disposed in areas not authorized by existing environmental legislation in each country
