

ENVIRONMENTAL POLICY OF RADIADORES ORDOÑEZ, S.A.

RADIADORES ORDOÑEZ, S.A. expresses its commitment to the manufacture of radiators, assuring an appropriate management of resources, protecting the environment and responding to the environmental demands of society, workers, customers and the Administration. The management acquires this commitment to the Environmental Management System in which environmental impacts are evaluated and controlled within an integrated management of continuous improvement and prevention of pollution.

To implement this Environmental Policy, Management has marked these main actions:

- Comply with environmental legislation and other legal and regulatory requirements.
- Inform and train workers to ensure environmental awareness and compliance with work that affects environmental performance.
- Continuously improve and prevent pollution by setting environmental objectives and targets that are regularly reviewed.
- Consider the possible environmental impacts and risks of the industrial activity, and take the necessary measures to control them, acting especially in the segregation and minimization of waste generated.
- Maintain communication with customers, suppliers, employees, administration and society in general in relation to environmental policy and environmental performance
- Maintain updated the Environmental Management System.
- Invite all workers to contribute and participate proactively in this commitment to the environment.
- Comply with all requirements of environmental management system according to international standard ISO 14001.
- The scope of this policy is all manufacturing process written in our Environmental Handbook in our facilities located in Av. Enrique Gimeno, 50 (Manufacturing of heat exchangers and accessories)

Castellón, 1st March 2018

Managing Director
